

Model IP13M120: Similar in operation to model IP10M220, however this model (IP13M120) protects 120VAC equipment/appliance.

NB: A steady red light after startup will indicate that a wiring/ground fault has been detected. The outlets will be turned on and the protector will continue its surge protection process. However, this type of fault is not good for your equipment and therefore should be corrected immediately.

Troubleshooting chart for Model IP13M120

INDICATOR	FAULT CONDITION
GREEN LED FLASH	DELAY TIMER/ STANBY
